ABB's pump controlling solution

How we face the challenges

Most of us take water for granted. Only when water supply fails do we realize just how dependent we are – whether in our homes or in industry.

The continuous processing of waste water depends on easily managed water treatment processes that just keep working. Pumps form a crucial part of our water treatment processes. They often operate in harsh environments and operating conditions, exposing motors to severe strain. Together with frequent starts and stops, this makes softstarters a vital tool to ensure maximum process availability.

Water controlled by man flows on a daily basis through pipes, dams and basins in massive quantities, unmatched by any other substance. To deliver successfully on these stringent demands, we need simple, efficient and reliable processes – controlled by softstarters.

Solving the problems of waste water

Water hammering is a well-known and undesired phenomenon that is frequently occurring in pipes. Besides causing disturbing noise, it puts excessive stress on pipes, valves and pumps.

Unlike conventional softstarters, ABB's torque control feature enables the softstarter to control the flow of the fluid with a feedback control loop. This will ensure true soft starting and stopping of pumps – and prolonging the lifetime of the equipment. Motors operating in cold climates risk freezing during standstill. **Motor heating** is a built-in PSTX feature that keeps the motor warm and dry without spinning. It works by transmitting just enough energy to the motor in

order to keep it warm. The feature eliminates the need for external heating systems in cold and damp climates. Clogging of pumps and pipes is a common cause of downtime and time-consuming service work in wastewater facilities. Thanks to a smart **pump cleaning feature**, the PSTX lets you clean pumps and pipes, directly from the softstarter. By simply alternating between forward and reversing of the pump flow, pipes are easily cleaned thus enabling higher up-time of your pump system.

ABB's softstarter improves waste water installations of Yantai Guhe Electric - China

Yantai Guhe Electric manufactures installation panels for pumps and provides some of the leading brands in the HVAC and fluid control segment with pump system control solutions. Pumping water through horizontal pipes demands a motor controller that can handle the way fluids behave. This is especially important when stopping the motor that runs the pump because a lot of stress is affecting the motor and water hammering occurs.

Thanks to ABB's softstarters having torque control, the issue of water hammering when stopping pumps was eliminated. The results that followed were very pleasing for Yantai Guhe Electric with downtime being reduced by 20 percent and cost of maintenance reduced by 40 percent - saving a total of 30000 US dollars per year.

Waste water - a tough environment for products

Benefits of ABB's leading product - The softstarter range

The installation of ABB products can help keep the wheels in motion 24 hours a day. We are focused on ensuring that our products can be easily maintained, whether that is through designing the product so it can be replaced while the system remains operational or providing built-in monitoring functions and efficient service solutions. In everything we do, we think of the customer and the application first. Our engineers constantly look for ways to simplify the installation process by developing innovative product designs which facilitate the product assembly and avoid mounting errors and reduce maintenance cost. Our engineers thrive on the challenge to develop products that need to operate in the most difficult electrical, mechanical and environmental conditions. Our solutions protect your application from overloads, network irregularities, mechanical wear, and environmental stresses ensuring your peace of mind. When you buy an ABB product, you buy extensive environmental testing guarantee.

Continuous operation

Secure motor reliability

- Detection of pump clogging and avoiding motor overheating with electronic overload protection.
- Fast stop if pump is jammed with locked rotor protection.
- Protection against dry pump using under current or power factor.
- Limp mode to keep the pump running even if one thyristor is shorted
- Motor heating function to operate even in cold and humid environments

Increase application productivity

- Pump cleaning with full voltage forward and jog backward to let the softstarter clean the pump.
- Torque control to eliminate water hammering.

Easy to install

Improve installation efficiency

- Detachable keypad to have full control of your application without opening the panel door.
- 15 different languages and graphical display for easy set-up and operation.
- Bypass reducing energy consumption while application running at full speed is already pre-installed and verified.

Harsh environment protection

Running in the toughest areas of the world

- Coated circuit boards for protection from dust, moist and corrosive atmospheres
- Detachable keypad is rated IP66 (Type 1, 4x, 12) for protection against dust and water.
- Wide main voltage range: 208-600 V.

Setup of a typical waste water pump panel

Maximize the possibilities

1 Softstarter PSTX

- Soft start and stop with reduced current
- Pump enhancing features
- Detachable keypad for front door mounting on a panel

2 Short circuit breaker MCCB

- Short circuit protection of motor
- Possibility to isolate

3 Pilot devices

- Remote control of motor
- Indication of softstarter and motor status with light and sound
- Emergency stop of motor

4 Power supply CP-E

- Possible to use 24V AC/DC equipments in the panel, e.g. PLC and pump controller

5 Liquid level monitoring relays CM-ENS

- Monitoring and signalling the water level

6 PLC 800M

- Automatic control
- Remote communication

7 Terminal blocks SNK range

- Easy installation of control wires

8 Line contactor AF

- Isolation at stop
- Isolation at faults
- Emergency stop
- Back-up D.O.L. starter

Challenging the standards for water applications

Benefits of ABB's solution

Continuous operation

Contactors AF

- Secure your uptime by letting the AF technology overbridge voltage drops and sags
- Built-in surge compression

Earth fault monitor CEM11

- Used in motor feeders to detect leakage currents respectively ground faults caused by insulation breakdowns.

Power supply CP-E

- Guaranteed power supply of the application with a high efficiency

Easy to install

Contactors AF

- The AF contactor is compact in size and has had its width reduced by up to 30%.
- The AF contactor has its coil terminals accessible from the front. The cables or bars do not have to be disconnected in order to perform voltage measurement or servicing work.

Terminal blocks SNK

- PI-Spring technology allows 50% faster connection time & reduced effort and conductor preparation time
- Avoid mounting and wiring errors thanks to SNK asymmetrical design and flat and visible marking area.
- The ABB screw clamp technology eliminates the need for retightening campaigns
- Save installation time with our snap on screwless ground terminal blocks, end stops, plugs and jumpers

Measuring and monitoring relays

- Whole S-range devices available in innovative new 22.5 mm design
- Push-in technology for tool-free connection of rigid and flexible wires with wire end ferrule
- Tool-free mounting on DIN rail as well as demounting

Circuit breaker Tmax & disconnect switch OT

- Easy mounting of device in panel for both horizontal and vertical installation
- Front side display to read values
- Switch can be mounted directly on front of the device

Harsh environment protection

Pilot devices

- IP67 / IP69K approved (withstand periodic submersion, high pressure, high temperature spraydown)
- Heavy duty design to suit in tough environments meeting major global industrial standards/approvals

Power supply CP-E

- Ambient temperature range during operation -40...+70 °C

Terminal blocks SNK

- SNK series is certified IEC Ex in accordance with IEC 60079-0 and IEC 60079-7: increased safety "Exe" world international standards for products used in explosive atmospheres.

PSTX – The advanced range

Technical data

Softstarter types		PSTX30 ... PSTX370	
Rated insulation voltage U_i		690V	
Rated operational voltage U_e		208...600 V, 208...690V + 10% / -15%, 50/60Hz ±5%	
Rated control supply voltage U_s		100...250 V +10% / -15%, 50/60Hz ±5%	
Rated control circuit voltage U_c		Internal or external 24 V DC	
Starting capacity at I_e		4 x I_e for 10 sec.	
Number of starts per hour		10 ¹⁾	
Overload capability	Overload class	10	
	Ambient temperature	during operation during storage	-25...+60 °C, (-13...+140 F) ²⁾ -40...+70 °C, (-40...+158 F)
Maximum altitude		4000 m (13123 ft) ³⁾	
Degree of protection	main circuit	-	
	Supply and control circuit	IP20	
Main circuit	Built-in bypass contactor	Yes	
	Cooling system - Fan cooled	Yes (thermostat controlled)	
	HMI for settings	Display	
(Human Machine Interface)	Languages	English, German, Italian, Dutch, Chinese, Finnish, Swedish, French, Spanish, Russian, Portugese, Turkish, Polish and Czech	
	Keypad	2 selection keys, 4 navigation keys, start key, stop key, info key and remote/local key	
Signal relays	Number of programmable signal relays	3 (each relay can be programmed to be Run, Bypass or Event signal)	
	K4	Default as Run signal	
	K5	Default as Top of Ramp (Bypass) signal	
	K6	Default as Event signal	
	Rated operational voltage, U_e	250 V AC/24 V DC	
	Rated thermal current I_{th}	5 A	
Analog output	Rated operational current I_e at AC-15 ($U_e=250$ V)	1.5 A	
	Output signal reference	0...10 V, 0...20 mA, 4...20 mA	
Control circuit	Type of output signal	1 Amp, U Volt, P kW, P hp, Q kVar, TmpMot, TmpSCR, cosPhi	
	Number of inputs	2 (start, stop)	
Signalling indication LED	Number of additional programmable inputs	2 (Each input can be programmed to be either; Non, Reset, Enable, Jog, Direct on line-On, Start motor 2, Start motor 3 or FieldBus-disable)	
	Power on	Green	
	Run	Green	
	Fault	Red	
External keypad	Protection	Yellow	
	Detachable keypad	Yes	
	Display	LCD type, graphical	
	Ambient temperature		
	During operation	-25...+60 °C, (-13...+140 F)	
	During storage	-40...+70 °C, (-40...+158 F)	
Start and stop functions	Degree of protection	IP66 (Type 1, 4X, 12)	
	Soft start with voltage ramp	Yes	
	Soft stop with voltage ramp	Yes	
	Soft start with torque control	Yes	
	Soft stop with torque control	Yes	
	Kick start	Yes	
	Full voltage start	Yes	
	Sequence start	Yes, 3 different sets of settings	
	Current limit	Yes	
	Dual current limit	Yes	
	Current ramp	Yes	
	Torque limit	Yes	
	Motor heating	Yes	
	Jog with slow speed	Yes	
	Limp mode with two-phase motor control if one set of thyristors is shorted	Yes	
	Field bus connection	Built-in Modbus RTU	Yes
		Connection for Anybus	Yes
Connection for ABB FieldBusPlug		Yes, with adapter	

¹⁾ Valid for 50% on time and 50% off time. If other data is required, contact your sales office.

²⁾ Above 40 °C (104 F) reduce the rated current with 0,8% per °C (0,44% per F).

³⁾ When used at high altitudes above 1000 meters (3281 ft) up to 4000 meters (13123 ft) you need to derate the rated current using the following formula.

[% of $I_e = 100 - \frac{x-1000}{150}] \times$ actual altitude for the softstarter, [% of $I_e = 100 - \frac{x-3280}{497}] \times$ actual altitude for the softstarter in feet.

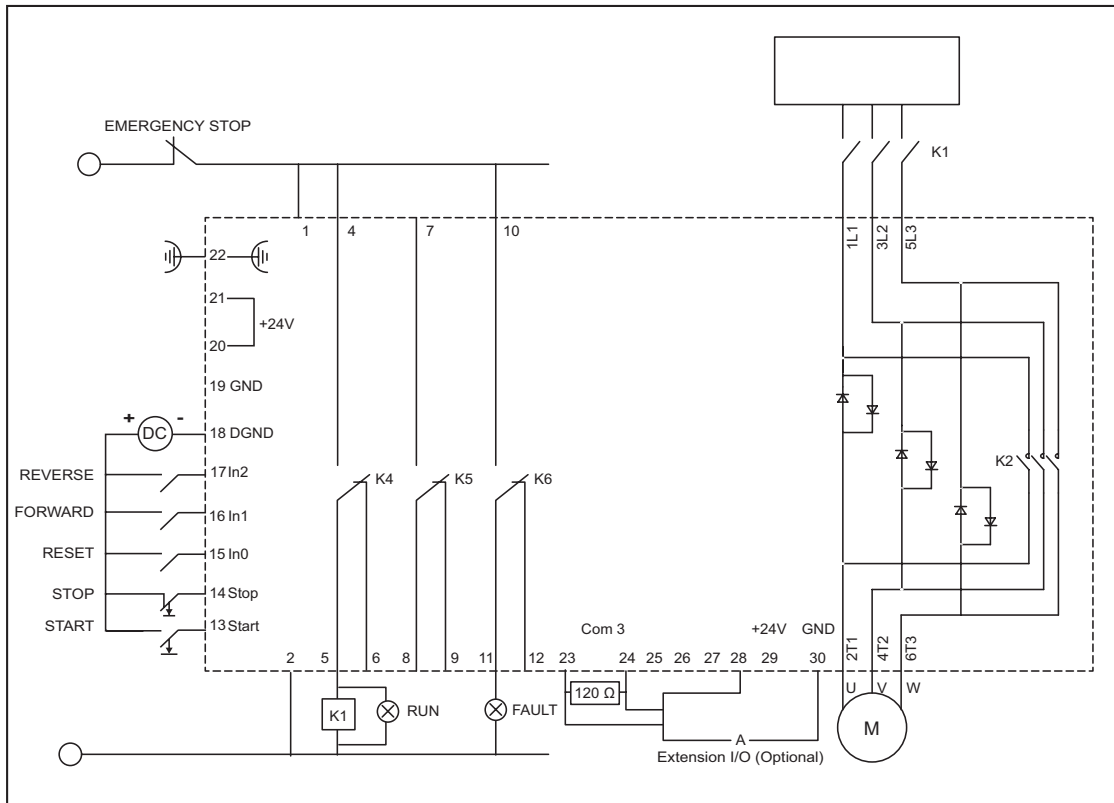

PSTX – The advanced range

Technical data

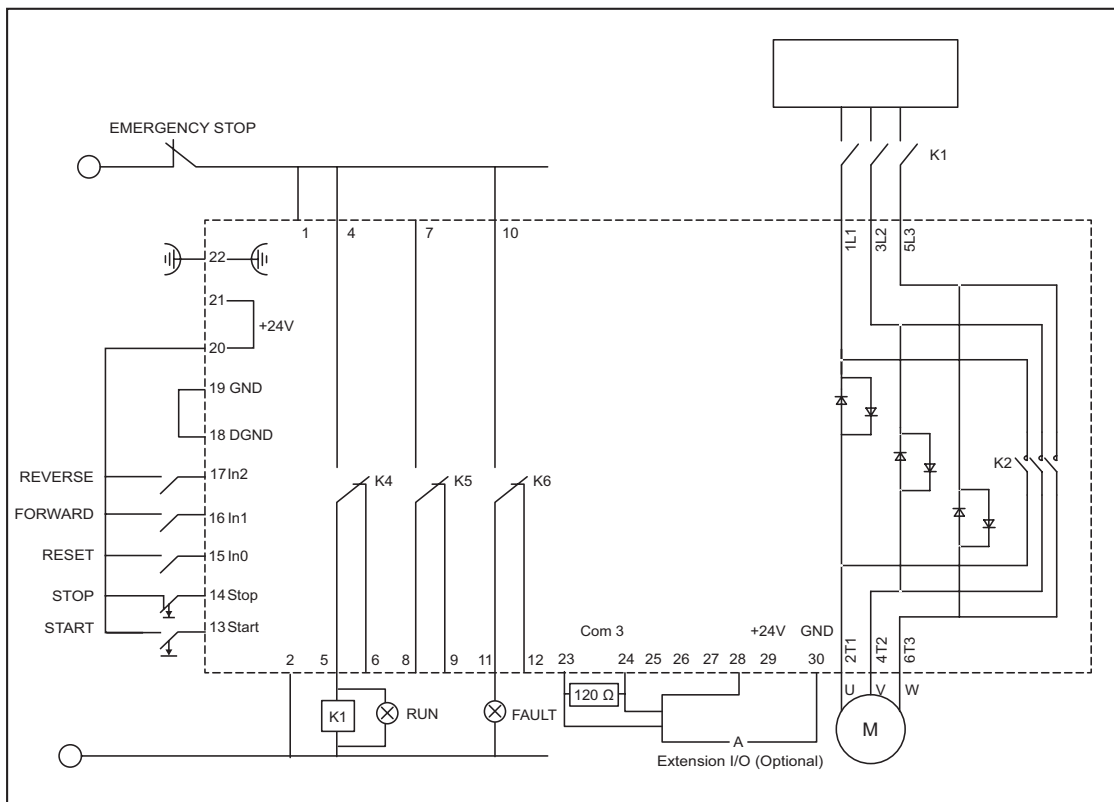

Softstarter types	PSTX30 ... PSTX370	
Protections	Electronic overload protection, EOL	Yes (Class 10A, 10, 20, 30)
	Dual overload (separate overload for start and run)	Yes
	PTC connection	Yes
	PT-100 connection	Yes
	Locked rotor protection	Yes (Level and delay adjustable)
	Current underload protection	Yes (Level and delay adjustable)
	Current imbalance protection	Yes
	Power factor underload protection	Yes
	Under voltage protection	Yes
	Over voltage protection	Yes
	Voltage imbalance protection	Yes
	Earth fault protection / ground fault protection	Yes
	High current protection (8 x I _e)	Yes
	Phase reversal protection	Yes
	Fieldbus fault	Yes
	Warnings (pre-warning) and embedded diagnostics	Current underload warning
Current imbalance warning		Yes
Voltage imbalance warning		Yes
Thyristor overload warning (SCR)		Yes
Electronic overload Time-to-trip		Yes
Electronic overload Time-to-cool		Yes
Over voltage warning		Yes
Under voltage warning		Yes
Power factor underload warning		Yes
Locked rotor warning		Yes
Faulty fans		Yes
THD(U) - Total Harmonic Distortion		Yes
Counted number of start sequences		Yes
Motor runtime measurement		Yes
Thyristor runtime measurement		Yes
External faults detection		Auto phase sequence detection
	Electricity metering	Yes
	Voltage sags detection	Yes
	Phase loss	Yes
	Hight current	Yes
	Low control supply voltage	Yes
	Open circuit motor side	Yes
Internal faults detection	Faulty connection	Yes
	Bad network quality	Yes
	Thyristor overload	Yes
	Short circuit	Yes
	Open circuit thyristor or gate	Yes
PTC input	Bypass open	Yes
	Shunt fault	Yes
Other functions	Switch off resistance	2825 ohm ± 20%
	Switch on resistance	1200 ohm ± 20%
Other functions	Real time clock	Yes
	Event log	Yes
	Keypad password	Yes

Pump control Circuit diagrams

Marketing material

Additional product information and documentation

PSTX softstarter marketing material

Catalog

The whole assortment for Softstarters and further technical information.
Available in different languages:

English: **1SFC132009C0201**
Spanish: **1SFC132009C0701**
Russian: **1SFC132009C1101**
Portuguese: **1SFC132009C1601**

Pump manual

How to install and set-up the PSTX softstarter for a pump application.

English: **1SFC132104M0201**

Brochure

Find out how to control the elements with ABB's softstarter range.

English: **1SFC132014B0201**

Water pump assortment marketing material

Electronic Products and Relays catalog & Selection tables

The whole assortment of EPR in one single catalog and a single panorama to choose the right products for your application.

English catalog: **2CDC110004C0210**
English selection table: **2CDC110083C0201**

Pilot device catalogs

Select the right pilot device for your application.

English catalog: **1SFC151005C0201**
English overview: **1SFC150002B0201**

AF contactor & motor control and protection

Short form catalog and product range catalog available.

English short form catalog: **1SBC100180C0201**
English catalog: **1SBC100192C0201**
