Introduction

SlimLine XR Gold

Energy efficiency

Energy consumption is rising all the time and is pushing for higher energy efficiency. With the new improved SlimLine XR Gold the power losses have been lowered by up to 35.5%. Thanks to the ITS2.1 you are also able to measure, control and monitor your devices. Now the ITS2.1 is able to connect to ABB Ability™ Electrical Distribution Control System (EDCS). This enables you to check and optimize your energy consumption when and where ever.

Easy to install

The use of plug-in contacts at the distribution busbars, an integrated slide support and increased cable termination area makes the installation easy and time saving. SlimLine XR Gold can be installed in horizontal or vertical direction. The concept of these kind of switches allows more outgoing feeders per switchboard saving cubicle, floor space and costs. The SlimLine XR Gold can even be removed and replaced in a switchboard with live busbars.

Safety and protection

True position indication will always show if the contacts are closed or open. True position indication can be lifesaving when performing maintenance to a distribution panel.

The SlimLine XRG Gold fulfils the highest requirements for modern switch disconnector fuses with a total safety concept. The switch disconnector fuses are tested according to the IEC 60947-3 Standard with more stringent requirements for isolation, making, performance and safety.

Higher short circuit ratings than before makes your panel even more efficient and safer.

Higher efficiency for more and more demanding markets

The higher efficiency was measured in tests that established the new Slimline XR Gold low-voltage switch fuse disconnectors meet the latest edition of the IEC60947-3 Standard. A 35.5 percent reduction in power losses was recorded. This efficiency gain means lower temperature rise, which translates to higher performance of the entire panel board.

Higher performance for longer life time

It is the only horizontal switch disconnector fuse with AC23A rating and is the only device where all active parts are silver-plated, with no bare copper. The greater durability means the Slimline XR Gold now has a longer working life and is suitable for more extreme conditions: the number of operations has increased by 400 percent from 1,600 to 8,000 operations and the short circuit making capacity has increased by 118 percent from 55kA to 120kA.

Introduction

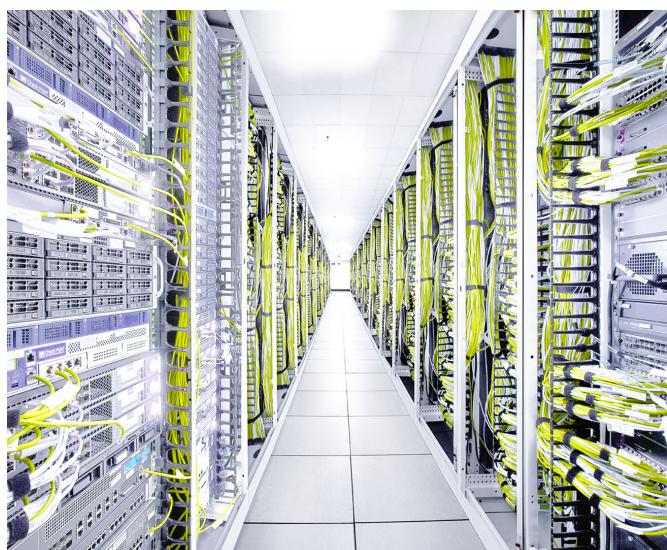

Applications and approvals

Applications:

- Distribution boards
- Building industry
- Oil and Gas industries
- Data centers
- Load Shedding
- Hospitals
- Airports
- Banks
- Shopping Centers
- In combination with Motor Control Centers
- When using emergency power supply
- Photovoltaic Power Plants

Approvals:

- IEC / EN 60947-3
- CB
- EAC
- CCC

Product overview

Electronic Fuse Monitoring (EFM)

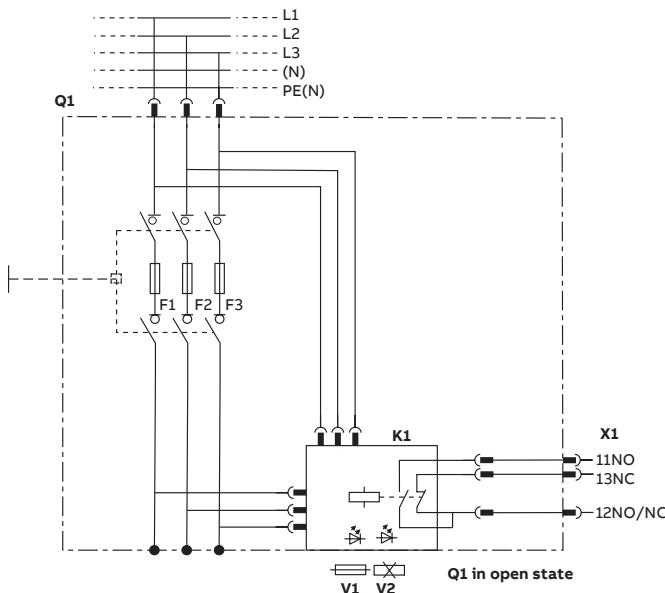

The New EFM is not only smaller and easier to install, but it is now also available up to 800V AC. The SlimLine XR Gold EFM gives an alarm at any fault conditions if a fuse is blown.

An internal potential free relay (1NC+1NO) will trip to transfer a signal for a remote fuse blown alarm. The EFM unit is self supplied, which means no additional power supply is required.

Product overview

Intelligent Tier Switch ITS2.1 and ITS2.D

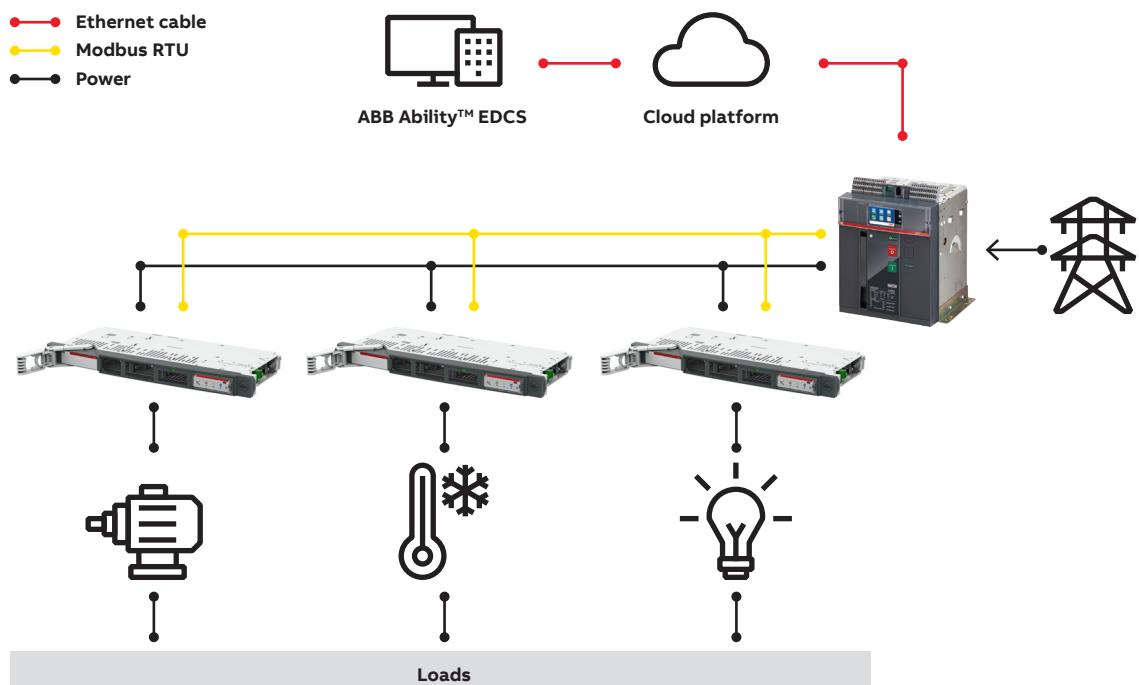

ITS2.1 is an integrated device to the SlimLine XR Gold, which enables you to monitor, analyze and control your energy consumption in modern commercial and industrial buildings.

ITS2.1 is now entering in a new digital phase where all data can be monitored and visualized from remote thanks to its integration with cloud-based ABB Ability™ Electrical Distribution Control System (EDCS). With such new feature ABB will drive and support the digital transformation of commercial and industrial buildings by making smarter asset and energy management simpler.

The cloud configuration will be done with Ekip Connect 3 Suite, our user-friendly tool which has been in use also for other ABB series, like ACBs, MCCBs and TruOne, thus making the ecosystem harmonized at all level.

The ABB Ability™ Electrical Distribution Control System (EDCS) shows you all the devices in your plant that are connect to it. You can easily monitor remotely the energy consumption.

As simple as that could be, an example of a simple architecture involves the ITS2.1 communication with the main incomer LV circuit breaker Emax 2 using Modbus RTU protocol. Emax 2 enables direct communication to ABB Ability™ Electrical Distribution Control System (EDCS) by using Ekip Com Hub cartridge module. It is important to note that SlimLine XR Gold must be equipped with ITS2.1 to enable such advanced functionality as described in the architecture below.

Product overview

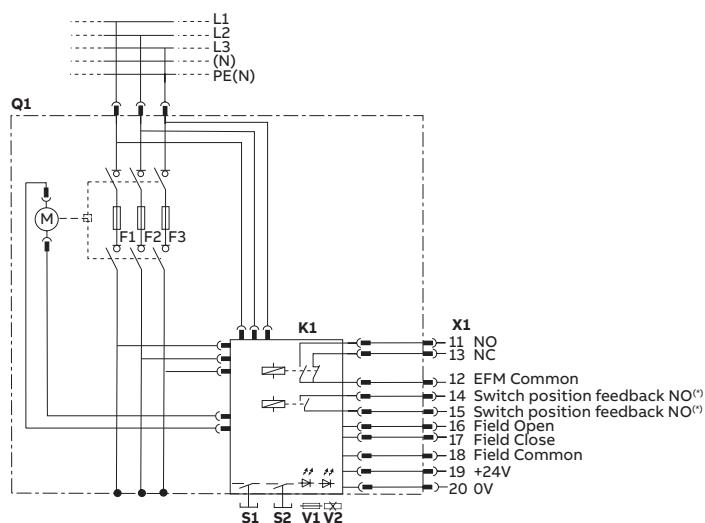

Motor operation (MOT)

SlimLine XR Gold offers an integrated motor for remote and local operation. The motor operation unit is 100% integrated without any changes of external dimensions. The front operated ON/OFF buttons are shrouded by a transparent cover with padlocking facility.

With the new improved Utilization category AC23A, SlimLine XR Gold enables up to 8000 operations. This is a perfect solution for load shedding. Load shedding is possible with only MOT or with MOT+ ITS2.1.

Product overview

Busbar Section Switch

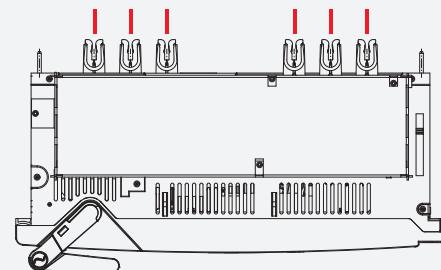

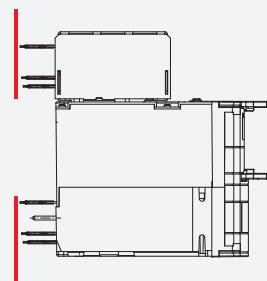

XR-SS/SP

XR-SS/SP switch disconnector fuse can sectionalize two parallel (SP) or serial (SS) busbar systems. It can be used with DIN fuse size 3. The XR-SS/SP has and Utilization Category AC23B, 690V, 630A. This product includes two ventilated blind covers, that will be mounted to the enclosure.

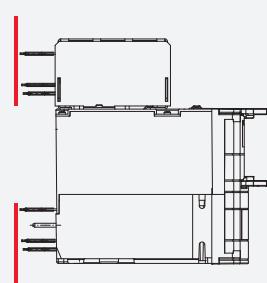

SlimLine XR Gold is available for the following busbar phase distances

50 mm distance between phases, 5 mm busbar

185 mm distance between phases, 10 mm busbar

SlimLine cassettes and IP busbar covers

SlimLine Cassette

The SlimLine cassette is a complete steel framework with busbar supports. It is used as a framework for easy installation of the SlimLine product range into switchgear systems which do not accept the SlimLine directly.

Facts about the SlimLine cassette:

Available in 4 sizes:

Height = 500 mm, max 10 pcs. 00-devices

Height = 1000 mm, max 20 pcs. 00-devices

Height = 1500 mm, max 30 pcs. 00-devices

Height = 2000 mm, max 40 pcs. 00-devices

- Supplied as a flat package without busbars
- Easy and fast assembly using self tapping screws
- For vertical or horizontal installation
- Aluzink coated profiles
- Front profiles as well as top- and bottom plates are black
- Extendable in the busbar direction
- Type tested busbar system
- 65 kA 10 x 40 -> 100 mm cu-busbars
- 3- and 4-pole solutions
- Available for 185 mm busbar distance

IP 20 busbar cover kit

Kit with busbar covers for IP 20 degree of protection. They can be snapped directly into the cassette.

Kit for 400 mm depth

In order to extend the normal depth of 200 mm in a standard cassette of 400 mm, a special 400 mm extra top and bottom unit is available for replacing the standard top and bottom units. Two units are required as replacements in one cassette. Order code 1SEP102079P0001 is for 1 unit.

Cassette for 185 mm busbar distance 3- and 4-pole

H = 500 mm

H = 1000 mm

H = 1500 mm

H = 2000 mm

IP20 busbar cover kit Universal 3- and 4-pole, 185 mm

Kit for:

H = 500 mm

H = 1000 mm

H = 1500 mm

H = 2000 mm

Rated current for the busbars

CU-profile (mm)	Max current* (A)	Short circuit current (kA) rms 1 sec.	Rated Voltage (V)
10 x 40	715	65	690
10 x 50	852	65	690
10 x 60	985	65	690
10 x 80	1240	65	690
10 x 100	1490	65	690

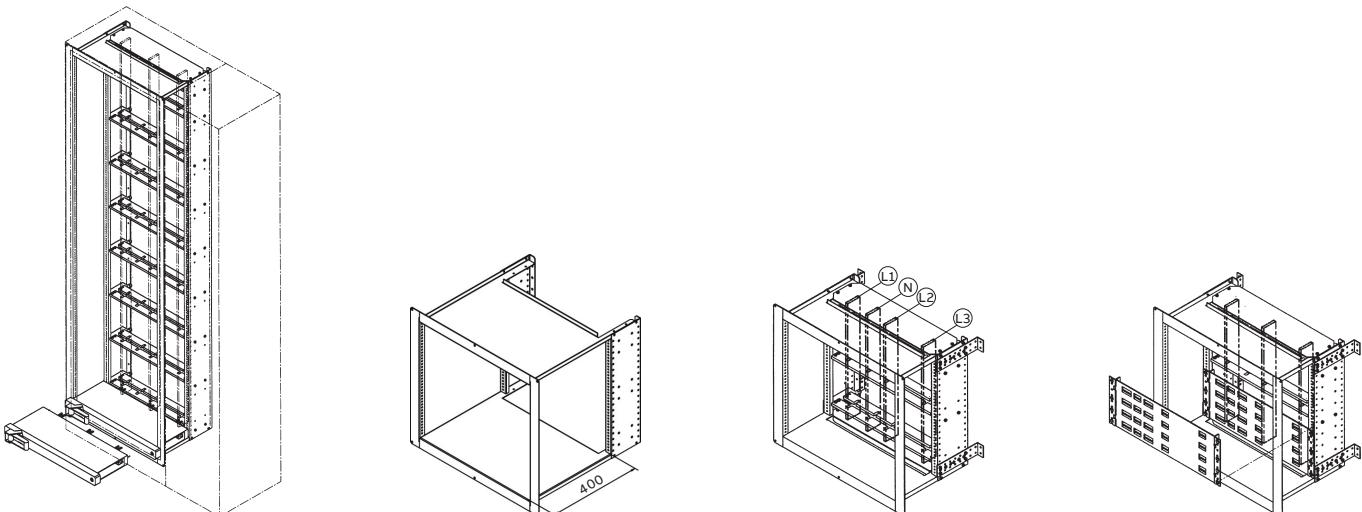

* All values at 35°C ambient temperature and busbar temperature of 65°C.
